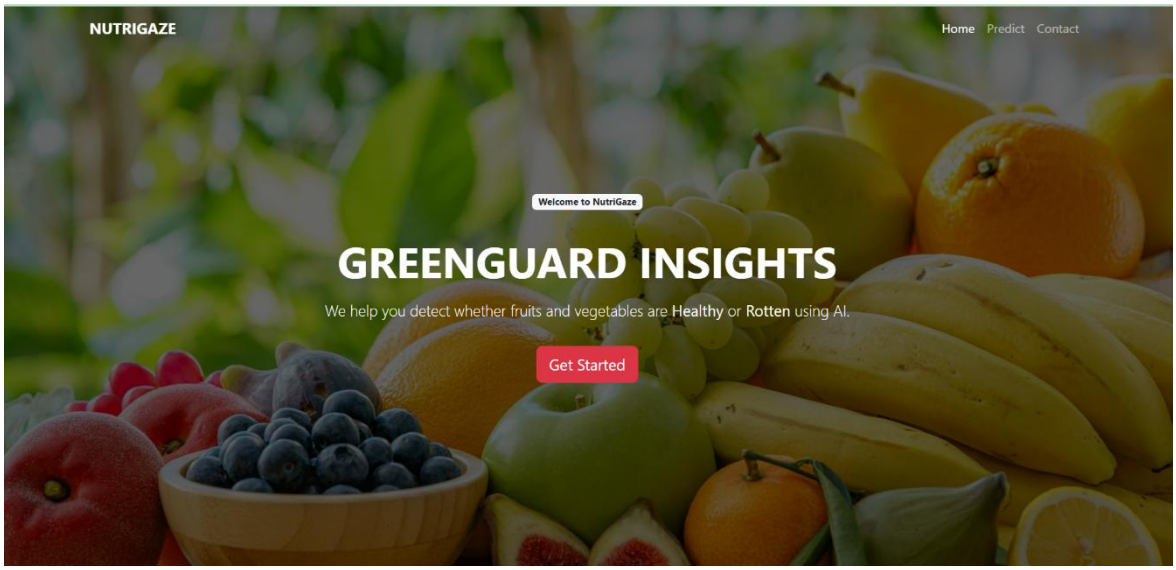
User Acceptance Testing (UAT) Template

Date	17 February 2026
Team ID	LTVIP2026TMIDS79524
Project Name	Smart Sorting: Transfer Learning for Identifying Rotten Fruits and Vegetables
Maximum Marks	4 Marks

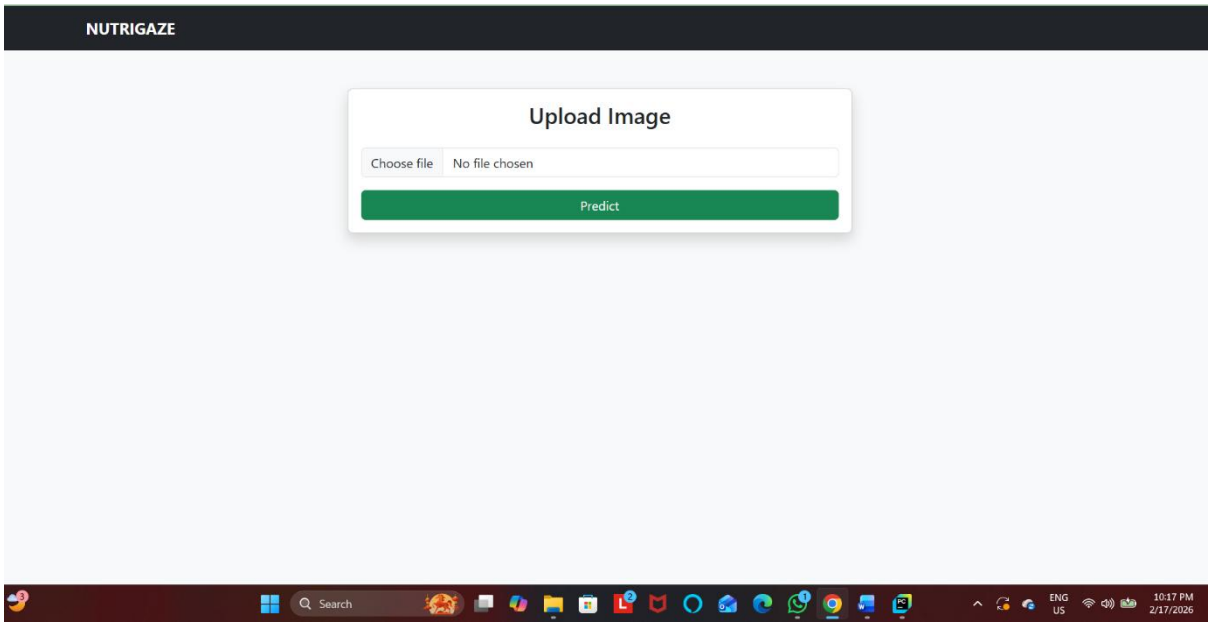
Project Overview:

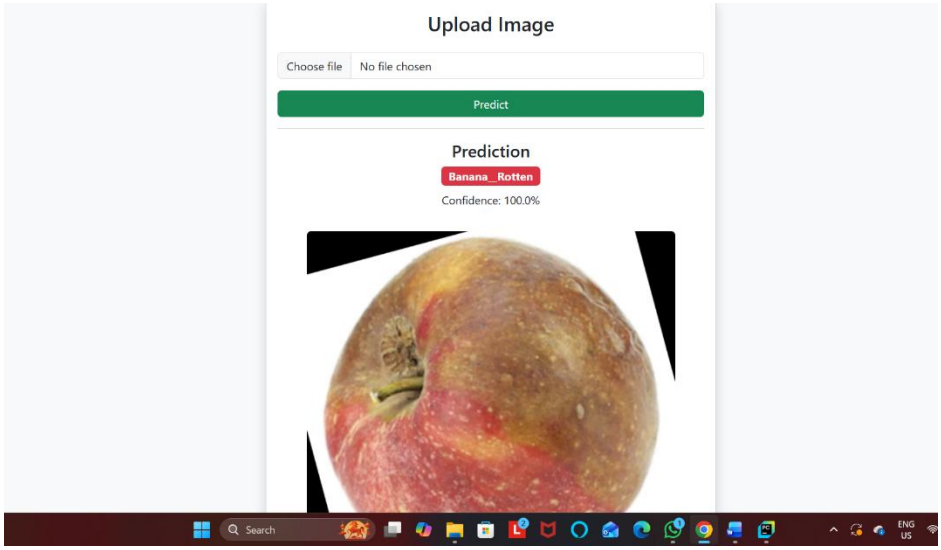
Let's see how our home.html page looks like:



Now when you click on the **"Get Started"** button from the top right corner, you will be redirected to the **predict.html** page.

This page is where the main interaction happens. It provides a simple interface that allows users to upload an image of a fruit or vegetable for analysis. Once an image is selected and submitted, it is sent to the backend model fo



r processing.


Now when you click on the **Detect** button, a pop-up message appears showing whether the uploaded fruit or vegetable is **Fresh or Rotten**, based on the model's prediction.
